Specification

The disclosure is objected to because of the following informalities: On page 1, applicant should update the continuing data. Appropriate correction is required.

Claim Objections

Claims 13-16 are objected to because of the following informalities: In claim 13, lines 2-3, "the catheter" lacks antecedent basis. It is only inferentially set forth in the preamble. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ginsburg. The claims are directly readable on Ginsburg in view of figures 7,8a-c which shows a catheter having a deflector arrangement comprising fins. The fins are capable of functioning as set forth in claim 13.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sohn and Schulte each disclose a catheter having fins.
